OLAMILEKAN BAMISILE

AI GENERALIST | AUTOMATION & WEB DEVELOPMENT
+2349067787642 | Lagos, Nigeria | lekanbamisile@gmail.com
lekanbams.vercel.app | LinkedIn Profile

PROFESSIONAL SUMMARY

AI generalist with hands-on experience building client websites, AI assistants and workflow automations. Combines web development, API integration and prompt engineering to deliver practical tools for community support, expense tracking and business operations. Experienced in AI-assisted development, deployment and troubleshooting.

CORE SKILLS

- Workflow automation, AI agents, prompt engineering, document retrieval and AI-assisted development
- **Workflow and Development Tools:** n8n, Make, Claude Code, Claude Design
- **AI Tools:** OpenAI, Gemini, Claude, ChatGPT, MCP
- **Web and Programming:** React, Next.js, JavaScript, HTML, CSS, Tailwind CSS, Python
- **Integrations and Data:** APIs, webhooks, Google Sheets, Airtable, Supabase, Notion, Gmail
- **Delivery:** Vercel, troubleshooting, documentation, process improvement and team coordination

PROFESSIONAL WORK EXPERIENCE

Independent Projects (Web Development & Automation) ***Lagos, Nigeria***
AI Generalist May 2026 – Present

- Built and delivered three client websites for LAKA, Amblessed and Fade Adetoba, presenting their work, experience and partnership information.
- Built and deployed RAG-B, an AI community-support assistant that answers questions from project documents using OpenAI, with documentation updates via Telegram.
- Built a Telegram expense tracker that records spending in Google Sheets and sends automated daily summaries.
- Developed an AutoDeck demonstration connecting website booking requests to n8n, Google Sheets and customer confirmation emails.

Crowd Clairvoyance ***San Francisco, USA***
AI Automation Intern (Remote) September 2025 – March 2026

- Built a market-monitoring workflow using Python, n8n and Gemini to track portfolio prices, analyze related news and send price-catalyst reports through Gmail.
- Built a scheduled mining-news pipeline using n8n and Gemini to collect and summarize articles, with X API publishing and error handling.

Axelar Network ***Remote***
Technical Research & Content Writer February 2025 – July 2025

- Researched cross-chain integrations and network developments, translating technical concepts into clear educational content for X.
- Published technical posts attracting 100–1,000+ views per post.

Merekat (Clober) ***Remote***
Web3 Community & Research Lead May 2023 – February 2024

- Connected community members with developers, gathering user issues and communicating technical feedback.
- Managed three Discord servers, building two from scratch and restructuring an existing server’s channels and roles.
- Set up verification systems across all three servers to limit bot spam.
- Researched user demographics and protocols to inform a targeted growth campaign that attracted 150+ followers.

SELECTED PROJECTS

Garri Rush September 2026

- Built and launched a React match-3 web game with scoring, timed survival gameplay and a mobile-friendly interface.

AI Voice Concierge | TS Academy Capstone May 2026

- Led an eight-person team to build a Vapi voice concierge that handles restaurant customer calls, orders and inquiries.
- Organized team meetings, tracked project updates and helped teammates resolve blockers to keep delivery on schedule.

EDUCATION

Bachelor of Science (B.Sc.) | Geology
University of Ibadan, Ibadan, Nigeria | March 2025
